## (C) epd-norge

## Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

## JACKOFOAM XPS SWEDEN

## BEWI

The Norwegian EPD Foundation

Owner of the declaration:
Bewi Insulation Scandinavia
Product:
JACKOFOAM XPS SWEDEN
Declared unit:
1 m2

This declaration is based on Product Category Rules:
CEN Standard EN 15804:2012 + A2:2019 serves as core PCR
NPCR 012:2022 Part B for thermal insulation products

Program operator:
The Norwegian EPD Foundation

## Declaration number:

NEPD-4130-3357-EN
Registration number:
NEPD-4130-3357-EN

## Issue date:

17.01.2023

Valid to:
17.01.2028

## General information

## Product

JACKOFOAM XPS SWEDEN

## Program operator:

Post Box 5250 Majorstuen, 0303 Oslo, Norway
The Norwegian EPD Foundation
Phone: +47 23088000
web: post@epd-norge.no

## Declaration number:

NEPD-4130-3357-EN

This declaration is based on Product Category Rules:
CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 012:2022 Part B for thermal insulation products

## Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

## Declared unit:

1 m2 JACKOFOAM XPS SWEDEN

Declared unit with option:
A1,A2,A3,A4,A5,C1,C2,C3,C4,D

## Declared unit, specification

$1 \mathrm{~m}^{2}$ Jackofoam 250 XPS insulation board with 34 mm thickness at $\mathrm{R}=1 \mathrm{~m}^{2}$

K/W, transportation to site, waste handling and recovery.
General information on verification of EPD from EPD tools: Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

## Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.
Third party verifier

## Owner of the declaration

Bewi Insulation Scandinavia
Contact person: Svein Tore Larsen
Phone: +47 95076742
e-mail: svein.tore.larsen@jackon.no

## Manufacturer:

Bewi Insulation Scandinavia
Sørkilen 3
1621 GRESSVIK, Fredrikstad i VIKEN, Norway

## Place of production:

Bewi Insulation Scandinavia, Skövde
Diabasvägen 6
SE-541 52 Skövde, Sweden

## Management system:

ISO 9001: 185977-2015-AQ-NOR-NA and ISO 14001: 251411-
2017-AE-NOR-NA

Organisation no:
913019334

Issue date:
17.01.2023

Valid to:
17.01.2028

Year of study:
2021
Comparability:
EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

## Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Mikael Danestedt
Reviewer of company-specific input data and EPD: Svein Tore Larsen

Approved:

Håkon Hauan
Managing Director of EPD-Norway

## Product

## Product description:

The insulation board is provided in several dimensions and thicknesses. Please use the conversion table below for other sizes than the declared unit.

## Product description

Extruded polystyrene (XPS) is a common material used for thermal insulation of buildings and constructions. It's a polymer foam, consisting of airfilled polystyrene cells. As most of the material is air, XPS provides good insulating properties at a low weight. Other characteristics of the material include low moisture absorption, long service life and high compressive strength.

This LCA is based on Jackofoam 250 and can be used for all Jackofoam products with the conversion factor which can be found under System boundaries.

## Product specification

XPS is manufactured through an extruder where polystyrene granulates are mixed with additives and foaming agents to produce the foam mass. The foam mass is pressed out flat to a board through a nozzle in deisre thickness and cut into correct dimensions. Some of the remaining blowing agents are aired out before the product leaves the factory gate.

The number of the product is the pressure class; here 250 which means a short dermation of $10 \%$ when the load of the product is $250 \mathrm{kN} / \mathrm{m} 2$. Weight per declared unit is $0,971 \mathrm{~kg}$ given a density of $28,5 \mathrm{~kg} / \mathrm{cu}$ bic meter with a thickness of 34 mm including packaging material.

Density:
200: $27,5 \mathrm{~kg} / \mathrm{m} 3$
250: $28,5 \mathrm{~kg} / \mathrm{m} 3$
300: $31,0 \mathrm{~kg} / \mathrm{m} 3$
400: $36,0 \mathrm{~kg} / \mathrm{m} 3$

| Materials | $\mathbf{k g}$ | \% |
| :--- | :---: | :---: |
| Plastic - Polystyrene expandable (EPS) | 0,90 | 92,26 |
| Chemical | 0,04 | 4,53 |
| Expansion gas | 0,02 | 2,44 |
| Packaging - EPS | 0,01 | 0,78 |
| Total | 0,98 |  |
| Packaging | $\mathbf{k g}$ | $\%$ |
| Packaging - Plastic | 0,03 | 100,00 |
| Total incl. packaging | 1,00 |  |

## Technical data:

CE marking: XPS insulation boards are CE certified according to SS-EN 13164
Typical size: $600 \mathrm{~mm} \times 1200 \mathrm{~mm}, 600 \times 2400 \mathrm{~mm}$
Typical thickness: $10 \mathrm{~mm}-150 \mathrm{~mm}$
Moisture absorption: $>0,7$ vol\%
Compressive strength: $250 \mathrm{kN} / \mathrm{m} 2$ (declared unit), see conversion factors for other values
Fire class: Euroclass F

## Market:

## LCA: Calculation rules

Declared unit:
1 m2 JACKOFOAM XPS SWEDEN

## Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than $1 \%$ ) are not included. These cut-off criteria do not apply for hazardous materials and substances.

## Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

## Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials | Source | Data quality | Year |
| :---: | :---: | :---: | :---: |
| Chemical | ecoinvent 3.6 | Database | 2019 |
| Packaging - Plastic | ecoinvent 3.6 | Database | 2019 |

*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator
2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

## Biogenic Carbon Content

| Indicator | Unit | At the factory gate |
| :---: | :---: | :---: |
| Biogenic carbon content in product | kg C | $0,00 \mathrm{E}+00$ |
| Biogenic carbon content in accompanying packaging | kg C | $0,00 \mathrm{E}+00$ |

[^0]
## Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase
National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Data source | Amount | Unit |
| :---: | :---: | :---: | :---: |
| Electricity, Sweden (kWh) | ecoinvent 3.6 | 54,94 | g CO2-eq/kWh |

## Dangerous substances

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.
Indoor environment

## Additional Environmental Information

| Additional environmental impact indicators required in NPCR Part A for construction products |
| :--- |
| Indicator |
| Unit |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
