tesa® Insect Stop Lamella Door

55198, 55201

tesa® Pollen Protect Screen

55285

Dear ladies and gentlemen,

in accordance to article 33 of the REACH regulation, any supplier of an article containing a substance on the list in a concentration above 0.1 % (w/w) shall provide the recipient with sufficient information to allow safe use of the article including, as a minimum, the name of that substance.

tesa SE informs that the hook and loop tape of the a.m. articles contains, in a concentration above 0.1 % (w/w), following substance included on the candidate list (status: June 27, 2018) set out according to article 59 (1,10) of the REACH regulation:

4-Nonylphenol, branched and linear, ethoxylated (NPO)

The concentration of 4-Nonylphenol, branched and linear, ethoxylated (NPO) is < 0.15 % (w/w).

However it is not always possible to preclude low level raw material or film contamination of other substances included on the candidate list and this might result in tapes containing such substances at trace level. Analysis of such substances does not necessarily form part of our quality control system.

Following our information, the packaging materials of our articles do not contain any substances included on the candidate list (status: June 27, 2018).

Protection measures for the processing of the hook and loop tape are not necessary.

We provide this product information based on our current knowledge and experience and can neither give any warranty nor assume any responsibility for factors outside our control or knowledge.

In case of further questions, please do not hesitate to contact us. At tesa SE the people responsible for questions concerning REACH are:

Mr. Dr. Dirk Lamm, dirk.lamm@tesa.com, Tel. 040 88899 2977, Mrs. Dr. Anja Köth, anja.koeth@tesa.com, Tel. 040 88899 3938
